

ARNOplast
INNOVATIVE SYSTEMS

**PROFESSIONAL
AGRICULTURE**

ARNOplast

The company was established in 1975 as ARNO-stampi sdf. During the first years the company focused on designing and building moulds for injection moulding and blowing of plastic materials.

In 1983 the new company's name ARNOplast srl marks the first strategic layout which the company implements with the willingness to provide clients a complete service, from the designing to the finished product.

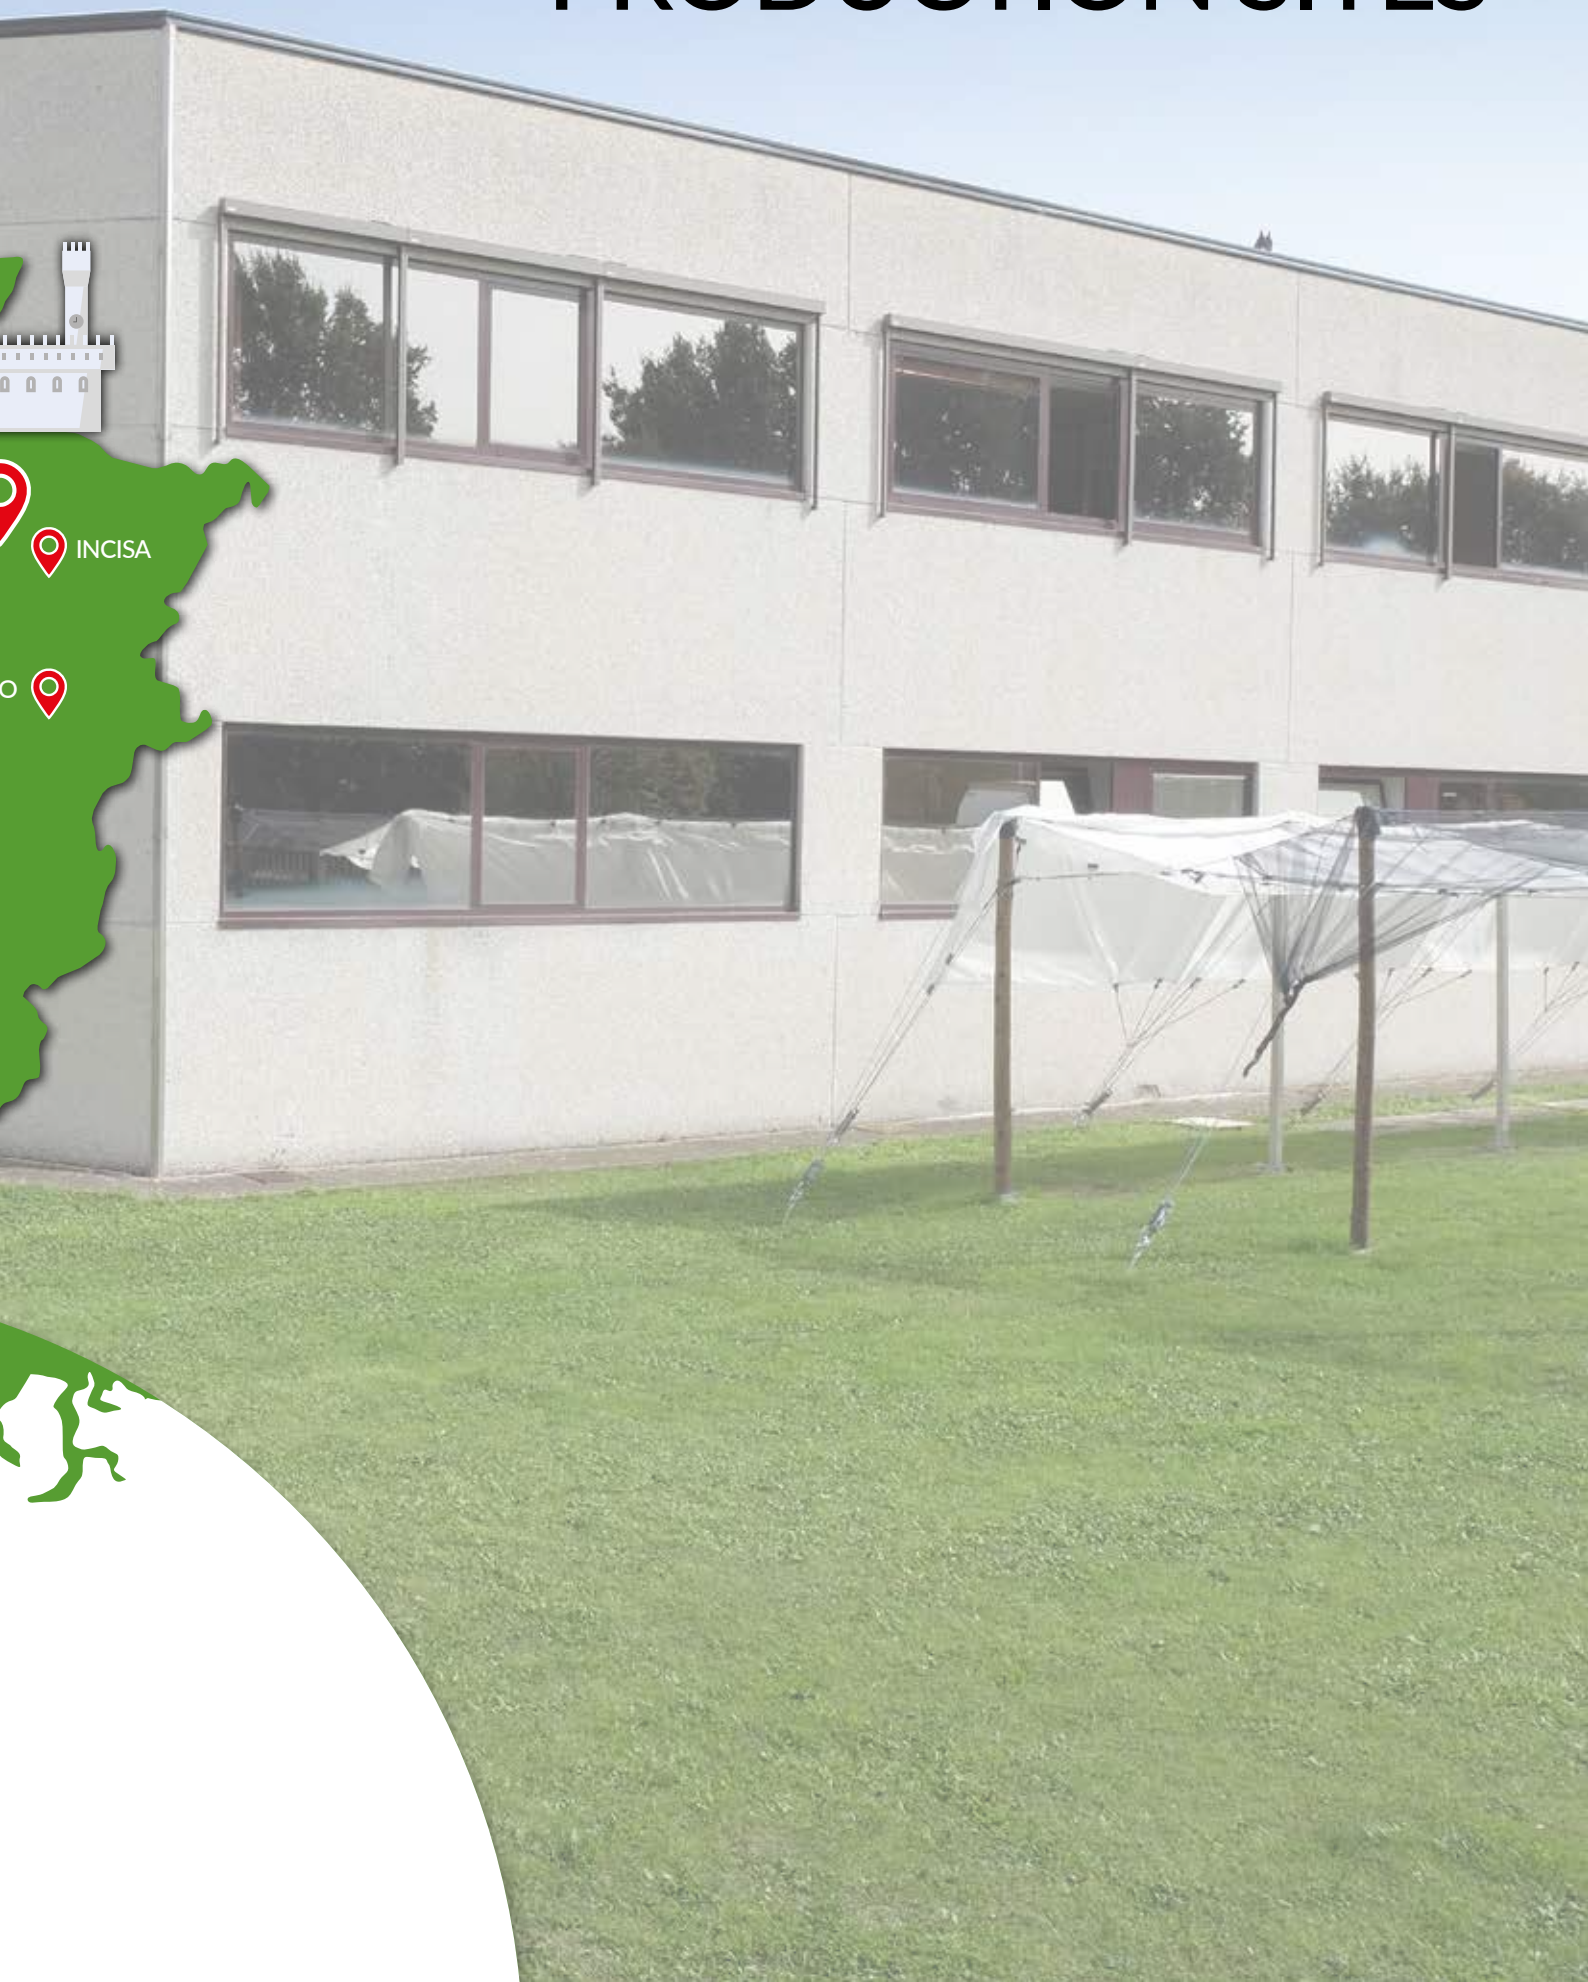

Also in the mid 1980's the company begins a limited production of accessories with its own brand name for professional agriculture targeted predominantly to Southern Italy's markets.

At the end of the 1990's, realizing the difficulties it would encounter from there on and due to sub-supply, the company carried out a second strategic turning point and decided to get the best from their own innovative capacities, presenting a new range of products with their brand for agriculture and gardening; also in this period the creation of a Company dedicated exclusively to the distribution process was created, the ARNOcommerciale srl.

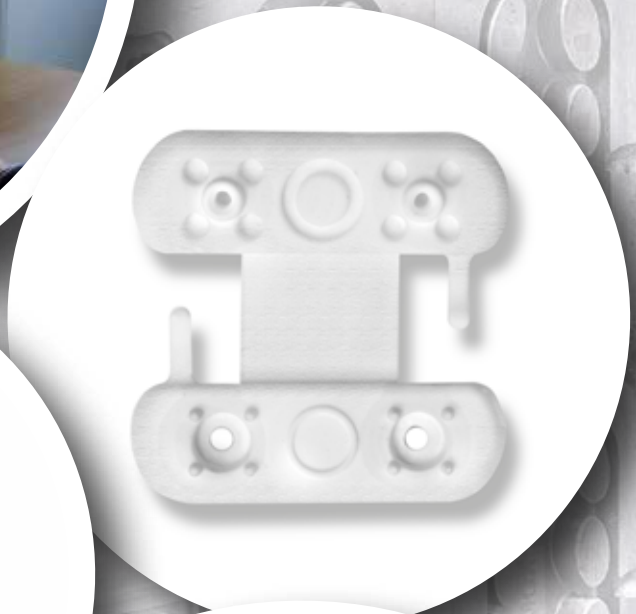

Today ARNOplast with head office and production plant in Rignano sull'Arno not far from Florence, together with ARNOcommerciale have acquired a position in the Italian market for the gardening agriculture systems and have commercialized their own products in all of Europe, in the Mediterranean area and in overseas countries.

1901-0501	PVC Skein 5,5MM Red	1 KG	15	600KG

POLYESTER WIRE

PET

FEATURES

- minimum elasticity
- it does not conduct electricity
- in the laying it must be stretched for about 1,5%
- wide range of elements for the laying on pg. 43
- used in vines and greenhouses

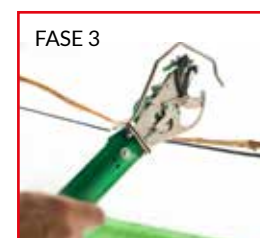

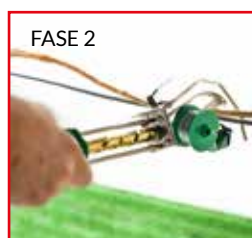

COD.	DESCRIPTION	PACK	BOX	PALLET
2101-0201	ARNO-PET 2,2 MM black (180MT/KG)	BOB.	10KG	60
2101-0301	ARNO-PET 2,6 MM black (130MT/KG)	BOB.	10KG	60
2101-0401	ARNO-PET 3,0 MM black (100MT/KG)	BOB.	10KG	60
2101-0701	ARNO-PET 3,5 MM NERO (70MT/KG)	BOB.	10KG	60

FEATURES

- hand and mechanical binder, it does not need battery
- in order to carry out a right binding, 3 movements are necessary
- perfect for year binding of the vines
- the wire get spoiled after a season facilitating the operation of extraction during the pruning
- each spool contains about 1100 bindings
- pliers: Boxed in blister - to be hanged
- different spare parts available upon request
- practical, strong and cheap
- made in France
- pliers weight with complete spool: about 500gr

COD.	DESCRIPTION	PACK	BOX
2203-0101	PLIERS LIGATEX	1	9
2203-0107	Spare spool (diam. wire 0,44mm/110mt)	24	96

2203-0115	Spare spool (diam. wire 0,60 / 70mt) PP coated	24	96
2203-0105	PLIERS SPARE KIT	1	1
2203-0106	BLADE SPARE KIT	1	1
2203-0109	PLASTIC TUBE GREEN	1	1
2203-0110	INTERNAL TRASMISSION	1	1
2203-0114	Chassis Ligatex	1	1

HOW TO USE

- Phase 1. Push onward the pliers on the shoot to be bound and let the metallic wire hang on the branch
- Phase 2. Practice a traction backward in order to allow the pliers to braid the metallic wire and at last to cut it
- Phase 3. Lift the pliers in order to come out the branch just bound when the handle is on the last run

SPOOL REPLACEMENT

- remove the finished SPOOL and replace the new one with the hole downward, insert the wire in the elastic wire guide.
- let the wire come out from the wire guide for some centimeters
- let the wire pass through the fixed metal hook
- operate the pliers pushing out the handle on the last run pressing the metallic wire on the iron hook
- allow the wire cut in the right way in order to start working

**FITTINGS, PET
AND SPARE PARTS**

EXTREME ATTENTION TO DETAILS

1. DETAIL SCREW FOR MORSA CLIP

2. DETAIL POINTS

3. PLASTIC GRANULE

LEGEND

1. Special screw with profile of thread perfect for plastic
2. Every detail has been studied and improved in time and with experience in order to simplify the mounting and better the product effectiveness
3. The most appropriate additive plastic material is used for each article in order to last out to UV rays and strain.
